CAREER OBJECTIVE

Seeking an entry-level software engineering position where I can apply my foundational knowledge in software development, enhance my technical skills and contribute to building innovative and efficient solutions while growing within a collaborative and dynamic team environment.

EDUCATION

BE in Information Science and Engineering	Dec 2022 - Present
CMR Institute of Technology Bangalore, CGPA: 8.52	
PUC (PCMB)	2020 - 2022
Sir MV PU College Davanagere, Percentage: 91%	
School	2010 - 2020
Aditya Birla Public School Kumarapatnam, Percentage: 90.8%	

SKILLS

Languages and Web: Java, C, Python, JavaScript, HTML, CSS

Framework and Technologies: MERN Stack, Next.js, Tailwind CSS, RAG, LangChain, MySQL

Tools & Platforms: Git, GitHub, Postman, Docker, Eclipse IDE, Visual Studio Code, MySQL Workbench

PROJECTS

- E-Commerce with AI Chatbot** **Feb 2024 - July 2024**
Description: Developed a fully functional e-commerce website featuring product listings, search and filter functionalities, shopping cart, user authentication (signup/login), and secure order placement. Integrated an intelligent AI-powered chatbot to assist users with product inquiries, order tracking, and support queries in real-time, improving user engagement and retention. Backend was built using Express.js and MongoDB for scalable performance, and Razorpay was used to enable seamless online payments.
Tech Stack: HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, Lyro AI Agent (Chatbot), Razorpay (Payment Gateway)
- Food Recipe Finder – API-Based Web Application** **Sep 2024 - Nov 2024**
Description: Developed a responsive and interactive food recipe web application that leverages a third-party API to fetch and display recipes based on user input. The platform allows users to search for food recipes by ingredients, meal type, or dietary preferences. It features a modern frontend design, real-time search suggestions, and dynamic rendering of recipe results.
Tech Stack: MERN Stack, and a third-party Recipe API (Spoonacular).
- AI Integrated Mock Interview Platform** **Feb 2025 - May 2025**
Description: Developed a full-stack AI-powered mock interview platform that simulates real-world interview experiences through dynamic question generation, real-time evaluation, and insightful feedback. The platform allows users to record interview sessions, receive AI-driven analysis on responses, and track their progress over time. Designed with a clean and intuitive UI for both desktop and mobile users, the system enhances interview preparation through intelligent automation and personalized learning.
Tech Stack: MERN Stack, Google Gemini Pro API (for AI feedback)

CO-CURRICULAR AND EXTRA CURRICULAR ACTIVITIES

- Hackathons:** Participated in Competitive Programming Hackathon | Participated in TYL Aptitude Hackathon.
- Online Courses & Certifications:** Data Structure and Algorithms in Java-Udemy, The complete Web Development bootcamp – Udemy.
- Seminars:** Seminar on “UK Dining Etiquette” | Presenter.
- NCC/ NSS:** Finished ‘A’ Certificate in NCC during school time(9th Class).
